BCMS High Level Policy Statement

This policy, which is approved by the Chairman of BCMS Steering Committee, establishes the commitment of Credence to its Business Continuity Management System and the requirements of the ISO 22301:2019 International Standard.

Cloud Services provided by Credence are important business assets of the Company and need to be protected from threats that could potentially disrupt business continuity. This policy has been written to provide a mechanism to establish procedures to protect against threats and minimize the impact to the provided services.

Credence Top Management is committed to complying with the requirements and maintaining the effectiveness and continued improvement of the Business Continuity Management System of Credence, which supports Credence's business strategy. Adequate resources and management effort and energy will be committed to this critical endeavor.

Detailed guidance on procedures to be followed in the event of disaster recovery for a disruptive event can be found in the relevant procedures and plans, which are accessible to all BCMS related personnel. This policy is communicated to all applicable internal and external stakeholders of Credence.

This Business Continuity Management Policy statement, objectives, procedures, and plans will be subject to annual re-evaluation for suitability, during the BCMS Management Review or if there is any major change in the business direction of Credence.

This policy is available to all interested parties via the Credence official website.

Signed:

Title: Chairman of BCMS Steering Committee, Credence
