

Reinvent.

Cloud Alpha Edge – the National Sovereign Cloud that can be tailored to drive innovation, scalability and operational excellence.

Cloud Alpha Edge: 5 Key Competitive Differentiators

No other cloud service provider offers some of the advantages we offer to guarantee you the ultimate peace of mind.

Cybersecurity

Advanced Cybersecurity: Keep threats at bay despite a rapidly evolving threat landscape and growing attack surface.

Connectivity

Ultra-Low Latency: Experience enterprise-grade connectivity and ultra-low latency, enhancing application performance, and both user and customer experience.

Compliance

Data Residency Compliance: Host your data securely ensuring full compliance with data residency and sovereignty laws.

Capabilities

Hyperscale Capabilities: Scale effortlessly with Cloud Alpha Edge, without compromising performance, availability, or security.

Industrial Platform Innovation: Create new business models, drive groundbreaking innovation, and next-level customer experience.

Cost

No Data Egress Charges: Enjoy predictable budgeting with no hidden costs, thanks to our no data egress charge policy.

Local Currency Billing: Billing in Malaysian Ringgit (RM), providing financial clarity and stability

Flexibility at its Core – Choose Your Cloud Deployment Model

Public Cloud

Shared cloud resources managed by a third-party provider.

Virtual Private Cloud

A private cloud within a public cloud for enhanced security.

Hybrid Cloud

A mix of private and public clouds for flexibility.

Multi Cloud

Using multiple cloud providers for optimisation and redundancy.

Comprehensive Cloud Solutions

IaaS

Compute (GPU and AI capabilities), Storage, Network, Infrastructure, Firewall, Data Centre.

PaaS

Cloud-based platform for app development & management.

SaaS

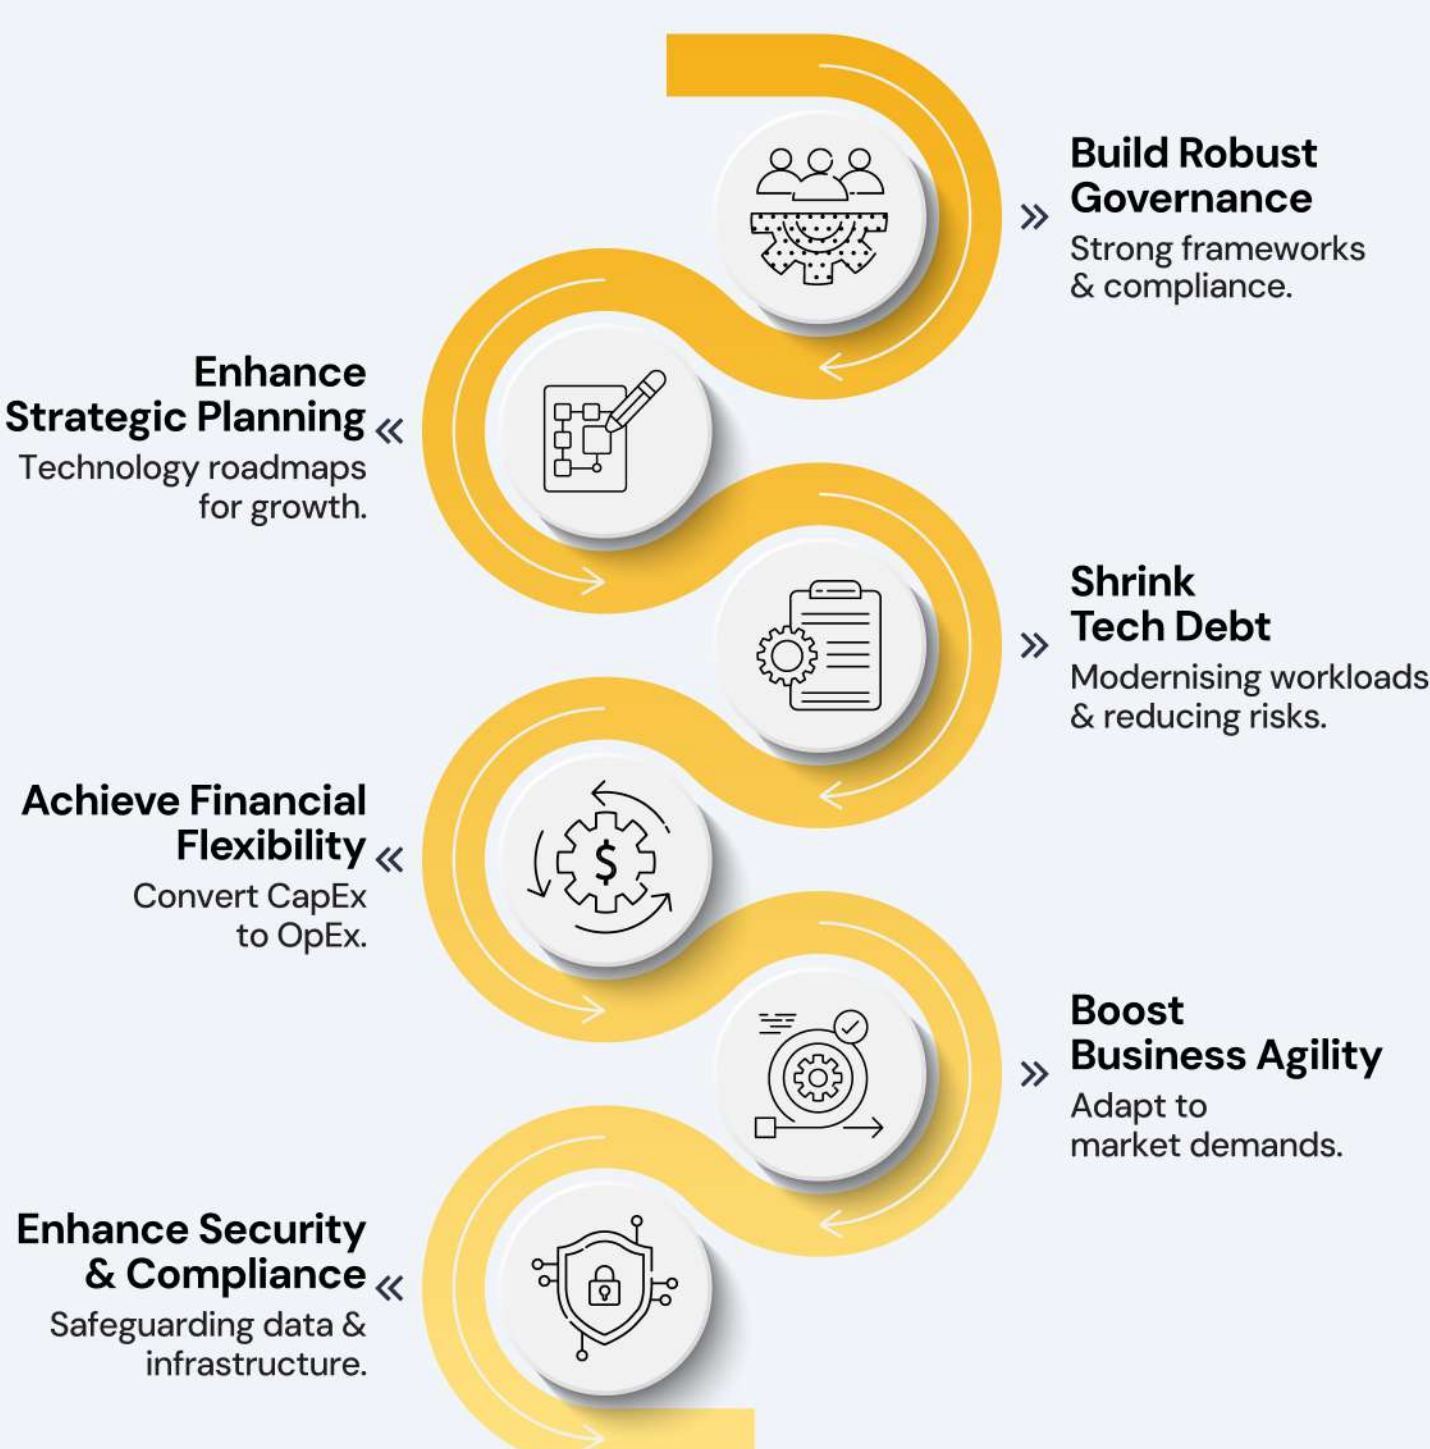

Subscription-based software, productivity & collaboration tools.

XaaS

Backup, Disaster Recovery, Archive, Function as a Service.

Transform Your Tomorrow – Scale with Confidence

Enhance Strategic Planning

Technology roadmaps for growth.

Build Robust Governance

Strong frameworks & compliance.

Shrink Tech Debt

Modernising workloads & reducing risks.

Achieve Financial Flexibility

Convert CapEx to OpEx.

Boost Business Agility

Adapt to market demands.

Enhance Security & Compliance

Safeguarding data & infrastructure.
